

Call for Workshops

Taking It To The Field: Building Inquiry Outdoors
Wednesday March 11, 2009
Peabody Mills Environmental Center, Amherst NH

We are seeking people willing to present a workshop or field experience at the NHEE Annual Conference and Meeting. This year's program will be held during the day with the conference beginning at 8:45 am. The focus is on field investigations and incorporating inquiry in the outdoors.

The morning sessions will be two hours long and allow for an outside field experience. This session is intended to be very hands on. The PMEC has snowshoes for use by participants. Ideas for this session include: natural history skill building, inquiry activities to do with students outside, conducting a field investigation.

There will be two afternoon sessions with three workshops each that will be an hour and fifteen minutes. These sessions are designed to build knowledge and skills around field investigations and inquiry. Program models would be welcome.

There will be a presenters discount for attendance at the conference. If you are interested in making a presentation, please provide the following information and return to Judy Silverberg at judith.silverberg@wildlife.nh.gov or Susan Cox at smcox@fs.fed.us by **January 15, 2009**
